RE: RFQ – Engineering Services for GEFA SRF Projects

The City of Douglas advertised a Request for Qualifications (RFQ) for Engineering Services to support water and wastewater improvement projects funded through the Georgia Environmental Finance Authority (GEFA) State Revolving Fund (SRF) Program and other federally funded initiatives.

Statements of Qualifications were received and publicly opened on March 19, 2026. Two (2) proposals were received from ESG Engineering and Mead & Hunt.

A Selection Committee evaluated all submissions based on the criteria outlined in the RFQ, including experience and qualifications, past performance, project suitability, and firm stability. Based on the evaluation, ESG Engineering received the highest cumulative score of 295 points, compared to 265 points for Mead & Hunt.

Based on this evaluation and overall ranking, ESG Engineering was determined to be the most qualified firm to provide the requested services.

The City of Douglas intends to award ESG Engineering as the selected consultant for engineering services related to GEFA SRF and other federally funded water and wastewater projects, pending final approval by the Mayor and Commission and successful contract negotiations.

The City of Douglas appreciates the interest of firms in this project and encourages continued participation in future procurement opportunities.

If you have any questions concerning this solicitation, please call me at (912) 389-3463.

Sincerely,

Anthony Folsom
Purchasing Agent
